Hierarchical Cancer Classification Report

AI-assisted decision support summary for cervix_dyk_0011.jpg

Executive Summary

Date & Time	2026-04-19 06:10:23	**Device**	cpu
Organ Model	Ready (resnet50_organ_classifier.pth)	**Subtype Model**	Ready (resnet50_subtype_classifier_best.pth)

Final Decision

Cervical Dyskeratotic Cells

Outcome: ABNORMAL Confidence: 67.30%

Label: Cervical Dyskeratotic Cells Pipeline Status: MEDIUM_CONFIDENCE

Tissue Route: Cervical Tissue Subtype / Outcome Detail: Cervical Dyskeratotic Cells

AI-generated decision support summary prepared for review.

Clinical Routing Summary

Hierarchical Cancer Classification Report

AI-assisted decision support summary for cervix_dyk_0011.jpg

Outcome	ABNORMAL
Confidence	79.18%
Entropy	0.80
Label	Abnormal tissue
Reason	None

Organ / Tissue Probabilities

Organ	Probability (%)
Cervical Tissue	56.77%
Lung & Colon Tissue	6.48%
Blood (Leukemia-related)	6.29%
Kidney Tissue	6.18%
Brain Tissue	6.17%
Breast Tissue	6.13%
Lymphatic System	6.02%
Oral Tissue	5.97%

Subtype Probabilities

Subtype	Probability (%)
Cervical Dyskeratotic Cells	67.30%
Cervical Koilocytotic Cells	4.98%
Cervical Metaplastic Cells	4.45%
Cervical Parabasal Cells	4.18%
Cervical Superficial-Intermediate Cells	4.09%

Warnings / Notes

Hierarchical Cancer Classification Report

AI-assisted decision support summary for cervix_dyk_0011.jpg

- Manual override used to continue past uncertain modality detection.
- Override used at Step 0 modality gating.
- Manual override used for uncertain tissue prediction.
- Subtype probabilities are close; doctor review is recommended.
