Hierarchical Cancer Classification Report

AI-assisted decision support summary for lymph_cll_0015.jpg

Executive Summary

Date & Time	2026-04-19 06:10:44	**Device**	cpu
Organ Model	Ready (resnet50_organ_classifier.pth)	**Subtype Model**	Ready (resnet50_subtype_classifier_best.pth)

Final Decision

Chronic Lymphocytic Leukemia

Outcome: ABNORMAL Confidence: 77.03%

Label: Chronic Lymphocytic Leukemia Pipeline Status: HIGH_CONFIDENCE

Tissue Route: Lymphatic System Subtype / Outcome Detail: Chronic Lymphocytic Leukemia

AI-generated decision support summary prepared for review.

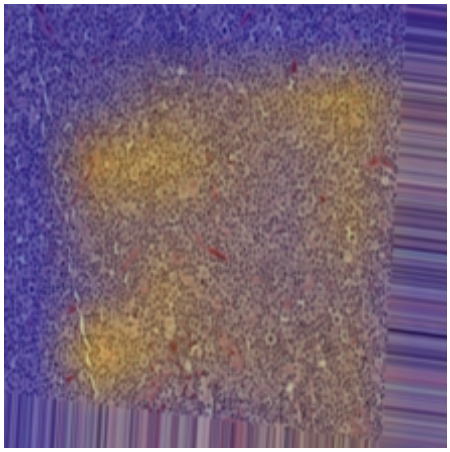
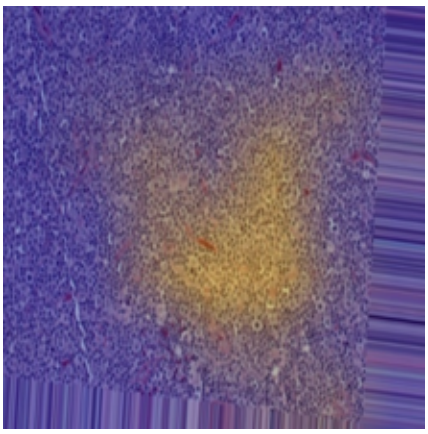
Grad-CAM: Organ Routing



Lymphatic System

Grad-CAM: Final Outcome



Chronic Lymphocytic Leukemia

Clinical Routing Summary

Hierarchical Cancer Classification Report

AI-assisted decision support summary for lymph_cll_0015.jpg

Outcome	ABNORMAL
Confidence	90.63%
Entropy	0.38
Label	Abnormal tissue
Reason	None

Organ / Tissue Probabilities

Organ	Probability (%)
Lymphatic System	56.93%
Breast Tissue	6.90%
Lung & Colon Tissue	6.30%
Cervical Tissue	6.06%
Oral Tissue	6.05%
Blood (Leukemia-related)	6.01%
Kidney Tissue	5.90%
Brain Tissue	5.84%

Subtype Probabilities

Subtype	Probability (%)
Chronic Lymphocytic Leukemia	77.03%
Follicular Lymphoma	4.44%
Mantle Cell Lymphoma	3.52%

Warnings / Notes

Hierarchical Cancer Classification Report

AI-assisted decision support summary for lymph_cll_0015.jpg

- Manual override used to bypass rejected modality detection. Verify this is a valid histopathology image.
- Override used at Step 0 modality gating.
- Manual override used for uncertain tissue prediction.
